Endangered!

Adaptations, food chains and classification.

WE'RE ALL GOING TO THE ZOO!

In a thrilling adventure that combined education and excitement, Year 4 students embarked on an unforgettable trip to Dudley Zoo, home to many of the world's most endangered species.

The visit was part of their Science curriculum, focusing on animal adaptation, food chains, and classification. The children were eager to explore the zoo's several walk-through exhibits, including Lemur Wood and Lorikeet Lookout, where colorful birds fluttered around them.

Equipped with packed lunches and boundless enthusiasm, the students engaged in hands-on learning experiences that brought their classroom lessons to life. They participated in activities designed to help them understand the complex relationships within ecosystems, including how different species interact through food chains. As they wandered through the lush pathways of the zoo, they learned about the vital roles of producers, predators, and prey in maintaining ecological balance.

The trip not only enriched their understanding of animal biology but also instilled a sense of responsibility towards conservation efforts for endangered species. With every lemur sighting and every colorful lorikeet perched nearby, the young explorers were reminded of the importance of protecting our planet's biodiversity.

Yes Chef!

Essential life skills.

COOL COOKING!

In an exciting twist, Year 5 children recently dove into the world of seasonal vegetables during their Design Technology lessons! The eager young chefs rolled up their sleeves and got hands-on, whipping-up delicious carrot soup and crispy croutons.

This mouthwatering project not only delighted their taste buds but also taught them invaluable life skills. The children learned about the safety needed to cook their food and the importance of reducing waste in the kitchen.

As the aroma of freshly made soup wafted through the hall, children gathered to savour their creations turning an ordinary day into a culinary adventure.

Parents were thrilled to hear about this tasty initiative, hoping it would inspire their little ones to embrace healthy eating habits.

Who knew that learning could be so delicious? Stay tuned for more tasty projects from our budding chefs!
