## What a blast!

### SUBLIME SCIENCE

Year 1 pupils experienced a day of scientific fun during their Sublime Science Day!

The excitement began with a hands-on workshop, where children created their own slime, learning about materials in a gooey, interactive way. They then delved into the mysteries of gravity by crafting helicopters, experimenting to see how they could make them fall faster.

Outside, the thrill continued with the Water Wacky Rocket launch, where rockets soared high into the sky, filling the air with laughter and cheers.

Back indoors, the pupils were mesmerised by a dry ice assembly, witnessing fascinating experiments that illustrated scientific principles in action.

This day of exploration not only sparked curiosity but also fostered a love for science among the young learners, making it a truly unforgettable experience!

### EASY FUNDRAISING

Don't forget to download the app 'Easy Fundraising' on to your phone to utilise whilst online shopping. It doesn't cost you anything extra but the school benefit significantly!

Thank you for your continued support.
